

Tomatoes on the Vine

Guaranteed Fresh Flavor

Product Description

Eurofresh Farms has grown tomatoes on the vine (TOVs) since 1998. For 11 consecutive years, this product has been recognized as “America’s Best Tasting Tomato” by the American Culinary Institute. These flavorful gems are a delicious addition to any fresh salad or can be used in cooking as well. Eurofresh Farms’ TOVs have established a premium reputation in the marketplace due to their uniform size, extended shelf-life, attractive appearance and high lycopene (cancer fighting and heart disease fighting antioxidant) content. Because these tomatoes are grown and packaged on the vine, they stay fresher, longer at the grocery store making them an ideal ingredient for any application.

Growing America’s Best Tasting Tomato

Eurofresh Farms is America’s largest greenhouse spanning 318 acres of facilities growing hydroponic tomatoes, cucumbers and bell peppers in many varieties.

What makes our products unique? We’re experts at growing greenhouse produce at a premium quality and certified pesticide-free with garden fresh flavor. For ten consecutive years, we’ve been recognized as the home of “America’s Best Tasting Tomato” by the American Culinary Institute.
